An investment in a Fund is a risky investment and investors in the Fund may suffer a loss in value up to an amount equivalent to a total loss of the entire capital invested in the shares of the Fund. Accordingly, potential investors must have adequate and sufficient liquidity to economically bear a total loss of their investment in the fund. This applies all the more as the fund is an illiquid financial product.

Further information on the sustainability aspects of the fund can be found in the web document and the issue document.
